

### 4FT T8 Integrated LED GROW LIGHT TUBE

Photo:  
Single Row type----20W

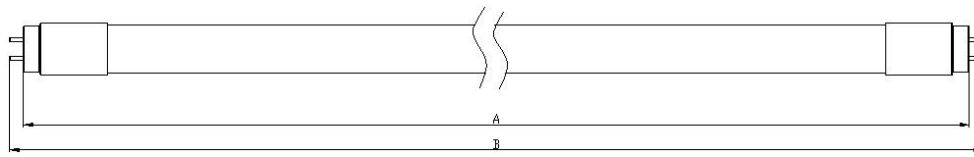

Double Row type----36W

Dimension: L1200mm X Dia26mm

A(mm) 1198mm

B(mm) 1212mm

ITEM NO.: SC-T8ST-04

Parameter:

Lighting angle of LED: 120°

LED QTY: single row---96pcs, double row---192pcs

Lifespan: >50,000hours

Worldwide Voltage: 100v-240v

Power Type: Double Ends Powered

PF>0.7

EF>0.9

Working environment : -20~40degrees, 45%~95%RH

Working Frequency: 50~60Hz

IP Rating: IP40

Wave Length: 380-840NM Full Spectrum or Daylight 5000-5500K T8 separate type led grow tube light

Power: single row---20W, double row---36W

Color:

Full Spectrum including UV: 420-430nm Red: 650-660nm Blue: 450-60nm

IR: 720-730nm R:B=5:1

Lighting Flux: single row---2350Lux, double row---5830Lux

PPFD(400~700nm): single row---55 $\mu$ mol/m<sup>2</sup>s, double row---110 $\mu$ mol/m<sup>2</sup>s

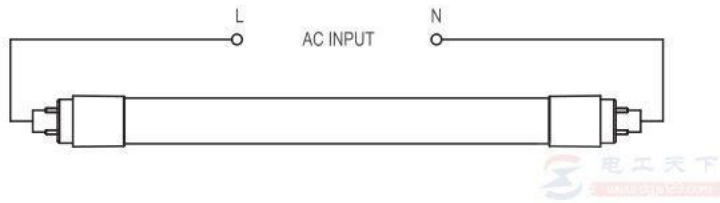

Peak Wave Length: 654nm

Feature

1. Most cost-effective, full spectrum grow LED chip
2. Our full spectrum grow LED chip use original epistar led chip to ensure more stable quality.
3. Full spectrum suitable for all kinds of plants in different stages
4. Suitable for hydroponics, horticulture, green house
5. Suitable for plants growing, flowering and fruiting

## How to connect or install

Please remove the starter or ballast before replacement.
